

Fast-Flying Falcons

Wild Falcon to be Released

A rehabilitated young male peregrine falcon will be released back into the wild at the conclusion of this educational program. The injured falcon was found with a wing injury last fall and was brought to the Nature Center for assistance. SOAR restored the young bird back to health and we are excited to watch it fly free!

Join us for the Woodbury County Conservation Foundation Annual Meeting at 1:30 p.m. prior to the Falcon Program.

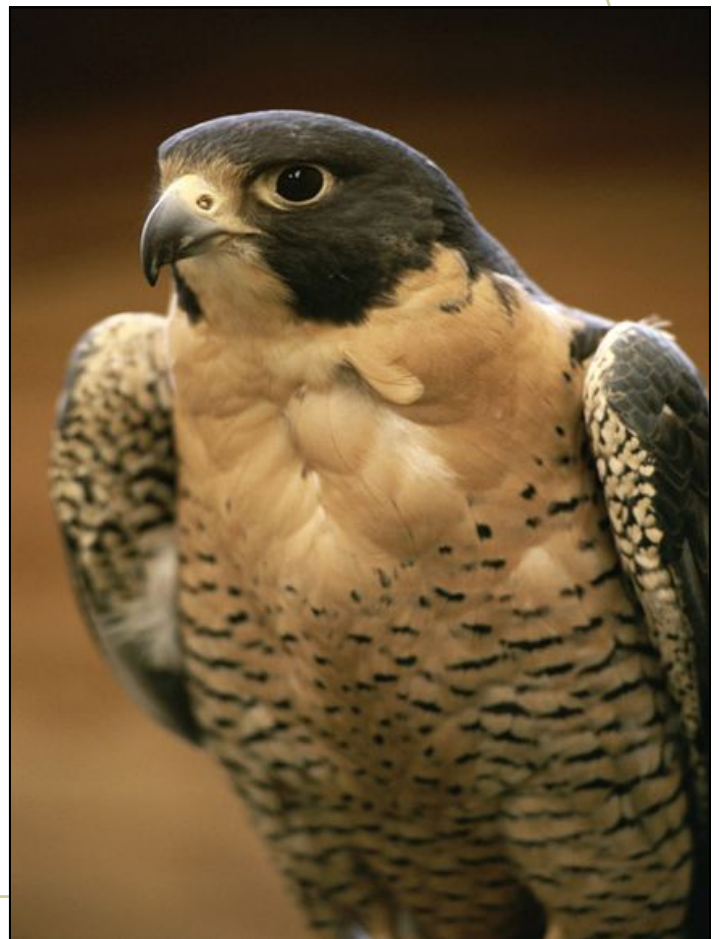

Sunday, March 7

2:00 p.m.

Dorothy Pecaut Nature Center

Learn about these fascinating birds of prey and view live falcons up close & personal.

Kay Neumann with **Saving Our Avian Resources (SOAR)** will provide a program on falcons for all ages to enjoy.
